 portfolio

Junior Front-End Developer, I'll play a vital role in creating engaging and user-friendly web experiences. Proficient in HTML, CSS, and JavaScript, I'll work closely with senior developers and designers to translate design mockups into responsive web pages. I'll be responsible for implementing visual and interactive elements, ensuring cross-browser compatibility, and optimizing site performance. A strong understanding of front-end frameworks like AngularJS is beneficial. I'll collaborate with back-end developers to integrate server-side logic, ensuring seamless functionality. Additionally, staying updated with emerging web technologies and best practices will be essential to contribute effectively to projects and grow as a developer.

Projects

- URL Shortening Landing Page [[Code](#)]
- Intro-Component with Signup Form [[Code](#)]
- Pricing Component with Toggle [[Code](#)]
- Build a Calculator [[Code](#)]
- Music player using JavaScript [[Code](#)]
- Temperature Converter [[Code](#)]
- Base Apparel Coming Soon Page [[Code](#)]

Education

Faculty of computers and information – AI Department | **Cairo University** | **2018-2022**

Courses and certificates

Self - study The Web Front end Learning Guide - Udemy

Self - study Angular course - Youtube

Skills

- **Technical Skills**

Software skills

- OOP.
- Data Structure
- Design pattern
- Clean code.
- SOLID principles
- Git: Github
